

A close-up photograph of a hand with dark skin placing a small, round, blue and yellow ball onto a green, textured pipe. The pipe is part of a miniature aquaponic system built on a cardboard base. The system includes two white paper cups, one containing a green ball, and various green pipes connected by clear tape. The background is a plain, light-colored surface.

AQUAPONIC RESTROOM

a prototype for sustainability

This is an indoor restroom that hides activists from authorities, while also providing rest and nourishment.

The Restroom is entirely self-sustaining. It has a sun roof to both let in light and power the internal filtration system: toilet waste is filtered to provide drinking water and to tend to the indoor garden.

“basically you're using
your old... *stuff* to
grow your own food”
