

🔄 HOUSE FREEZE

HOUSE FREEZE

a prototype for sustainability

This is to be used as a resident is being evicted: hitting the button on the wall freezes all their belongings in place.

One of the main concerns during an eviction is making sure residents do not lose all their personal items. House Freeze keeps them in place so activists can focus their energies elsewhere.

“so you can just be, like,
‘alright, cops are here’
and get up and whatever”
