SPECULATIVE ACTIVIST TECHNOLOGIES

SPECULATIVE ACTIVIST TECHNOLOGIES

mariam asad | missasad@gatech.edu | @mimib0t

This ongoing research asks: **What does it mean to design technologies for— and with— activists working towards radical social change?** These prototypes are the results of a critical making workshop with housing justice activists in Atlanta. These cards show some of the prototypes and concerns that came out of the workshop, like surveillance, communication, and autonomy. The prototypes demonstrate some of the unique challenges that arise in activist work and how we might design for them.
